

The Opportunity of Change:

Building and Being the Future Together

September 28-30, 2026 | Sacramento, CA

The **Bay-Delta Science Conference (BDSC)** is the region's premiere gathering of 1,000+ scientists, managers, policymakers, community leaders, and practitioners dedicated to advancing management-relevant science for the Sacramento-San Joaquin Delta and San Francisco Estuary.

Co-hosted biennially by the **Delta Stewardship Council** and the **U.S. Geological Survey (USGS)**, the BDSC showcases the latest research, syntheses, and other advances through three days of oral sessions, poster and art presentations, training opportunities, and networking events.

Sponsoring the BDSC provides critical support for the region's largest science forum and expands access for participants who play a vital role in connecting science to resource management.
